

Getting Started with C and C++ in Visual Studio Code (VSC)

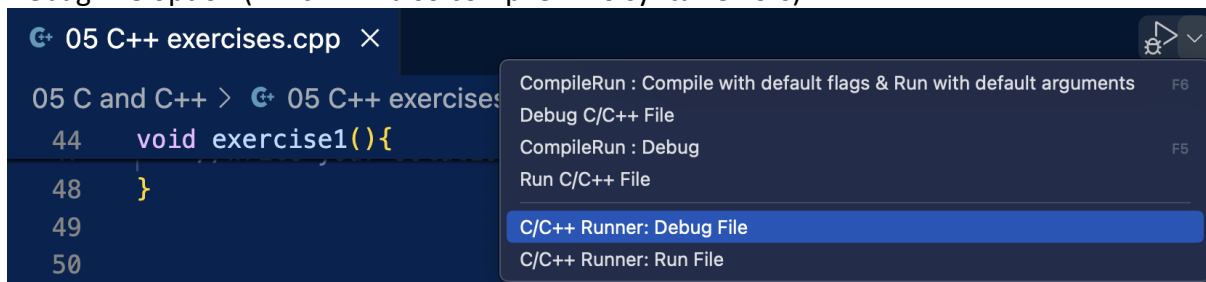

In Visual Studio Code, I downloaded the official Microsoft C/C++ Extension:

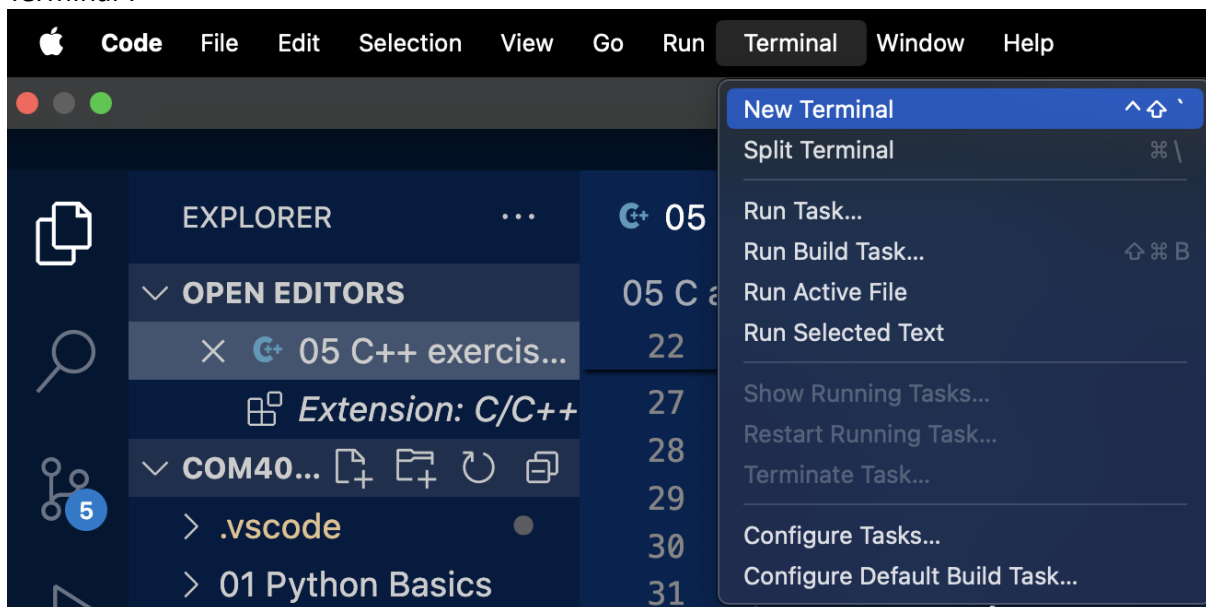

AND the **C/C++ Runner** Extension:

Then with the cpp file open, I clicked on the 'run' triangle and selected the C/C++ Runner: Debug File option (which will also compile if no syntax errors):

Then this should display in your Terminal at the bottom of the VSC environment. If you can't see the 'Terminal' view, then on the top menu, scroll along to Terminal and select 'New Terminal':

Your outputs should then appear:
